DETAILED ACTION

Claim Objections

Claim 3 is objected to because of the following informalities: the phrase "prim array" in line 2 should be changed to the phrase -prism array-.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayashi et al. (US 2005/0174803).

Hayashi et al. disclose (Fig.25) a surface light source including a light conductive plate [4] having a side surface as a light entrance surface, a first major surface as a light exit surface (surface facing to deflector [6]), a second major surface opposite to the first major surface, a plurality of point light sources (LEDs) [2] disposed at the light entrance surface of the light guide [4] and a light reflecting sheet [10] disposed at two major surfaces, covering a plurality of LEDs [2] and a portion of the light guide [4], and having a light diffusing property (page 16, [0158]).

While Hayashi et al. do not disclose a plurality of diffusing portions, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a

193 USPQ 8.

plurality of light diffusing portions on the reflecting sheet of the device of Hayashi et al., in order to obtain uniform light distribution, since it has been held that mere duplication of essential

working parts of a device involves only routine skill in the art. St. Regis Paper Co. v. Bemis Co.,

Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayashi et al. (US 2005/0174803) in view of Lee (US 6,164,790).

Hayashi et al. disclose the instant claimed invention except for a prismatic structure of the diffuser.

Lee discloses (Fig.10A, 14A) a backlight unit for LCD having a diffusing sheet [140] (Fig.10A) with an array of prisms extended orthogonally to the light incident side of the light guide (Fig.14A). One having ordinary skill in the art would have recognized that providing the apexes of the prisms point toward the first major surface of the light guide plate allows increase spreading the light emitted from the LEDs into the light guide plate.

It would have been obvious to one having ordinary skill in the art, at the time the invention was made, to provide the diffusing reflector of the device of Hayashi et al. having a plurality of prisms, as taught by Lee, in order to obtain uniform light distribution. Further, it would have been obvious to one having ordinary skill in the art, at the time the invention was made, to provide apexes of the prisms on the light reflecting sheet of the device of Hayashi et al., point toward the first major surface of the light guide plate on order to increase spreading the light emitted from the LEDs into the light guide plate.

Art Unit: 2875

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Mark Tsidulko whose telephone number is (571) 272-2384. The

examiner can normally be reached on 8 - 5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Sandra O'Shea can be reached on (571) 272-2378. The fax phone number for the

organization where this application or proceeding is assigned is (571) 273-8300 for all

communications.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
